

ST1500 Seeder

Versatility for high volume accurate sowing

Top left: Multi-singulator bars. Top right: Precise sowing. Right: Sows a variety of seeds.

About Williamses

Williamses design and manufacture innovative time-saving machinery for both horticultural production and tea harvesting.

Williamses' core strength is its ability to understand how seeds and plants behave when being handled mechanically and to transfer this understanding into practical designs for high performance machinery.

Leading by Innovation

The Williamses ST1500 Seeder operates at high speeds while maintaining accurate seed placement and depth control for a variety of seed and tray types. The Williamses ST1500 Seeder is capable of seeding up to 1500 trays per hour.

The Williamses ST 1500 Seeder features:

- Adjustable to suit most tray types
- Readily interchangeable dibber and seed drums for different seed types and tray configurations
- Simple seeder and dibber height control
- Powered rotary cleaning brush for dibber drum
- Large diameter seed drum to enable multi-seed singulation bars for optimal singulation
- Air brushes for accurate singulation on seed drum
- Accurate seed placement at chosen depth and position in cell
- Safe operation and auto stop mechanism
- Simple, robust and reliable
- Sows petunia to pumpkin and marigold to mahogany
- Integrated mechanical drive to enable variable speed and coordinated timing throughout

Dimensions Approx:

- Length: 3,034mm – 120"
- Width: 1,100mm – 43"
- Height: 1,500mm – 59"
- Weight: 750kg – 1,650lbs
