

# 1500 Seeding Line

Leading by Innovation

World class, high volume  
plant factory

The ST 1500 Seeding Line is a heavy duty machine designed to sow quickly while providing excellent fill and highly accurate seeding.

It is capable of sowing up to 1500 trays per hour and can plant in excess of 200 million cells per year.

It is fast accurate and reliable.

#### The ST1500 Seeding Line incorporates the following:

- FNC Filler
- ST 1500 Seeder
- V5 Vermiculite Coverer
- S3 Watering Tunnel

#### 1500 Seeding Line Features

- Fully proven integrated systems
- Fast accurate high quality sowing
- Robust construction
- Simple to operate
- Extremely reliable

#### Dimensions: Approx

Length: 11,174mm – 440"

Width: 2,757mm – 108"

Height: 3,225mm – 127"

Weight: 3,500kg – 7,716lbs

Top: Williames 1500 Seeding Line with optional soil deliver system & tray de-stacker.  
Above: Williames 1500 Seeder. Right: Precise sowing.

#### About Williames

Williames design and manufacture innovative time-saving machinery for both horticultural production and tea harvesting.

Williames' core strength is its ability to understand how seeds and plants behave when being handled mechanically and to transfer this understanding into practical designs for high performance machinery.
