WILLIAMES COMPOST SPREADER adds a topping of compost from any type of material after the tray has been filled and seeded e.g., pumice, potting mix etc.,.

The Williames Compost Spreader dispenses an even layer of covering and can operate at variable speeds.

- Simple to operate
- Trays trip the automatic **START / STOP** activation
- Adjustable feed-gate
- Ribbed belt feed for precision dispensing of the cover
- Viewing glass lets the operator assess the level of the hopper contents
- Single or three phase power available
- 2.0 cubic metre capacity
- Excess return equipment system available
- Robust construction means low maintenance and high productivity
